**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 4-21, drawn to surface mounting a coil to a substrate, classified in class 29, subclass 832.
  - II. Claim 22, drawn to hermetically sealing the coil, classified in class 29, subclass 841.
  - III. Claims 23-25, 72 and 101, drawn to ablating or abrading insulating material, classified in class 29, subclass 847.
  - IV. Claims 2, 3, 28-32, 74-100, 103, drawn to a coil and insulation on a tube, classified in class 29, subclass 606.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the inventions of each of Groups I, II, III and IV each have separate utility such as 1) surface mounting a coil to a substrate, 2) hermetically sealing a coil, 3) ablating or abrading insulating material, and 4) providing a tube on the coil. See MPEP § 806.05(d).
3. Claims 1 and 27 link(s) inventions of Groups I, II, III and IV. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 1 and 27. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all

Art Unit: 3729

the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

4. Because these inventions are distinct for the reasons given above and, for example, the search required for Group I is not required for Groups II, III, and IV, and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Due to the complexity of the restriction requirement above, a telephone call was not made by the examiner in order to give the applicants' the opportunity to fully review and consider the various inventions above.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
